TECNICHE
DI STAMPA
PRINTING TECHNIQUES

Tampografia

Una delle tecniche di stampa più utilizzate per la sua versatilità ed efficacia. Il logo viene trasferito sul prodotto per mezzo di un tampone in silicone che si adatta a tutti i tipi di superficie, ottenendo una grande definizione del logo anche in aree di marcatura molto piccole.

Pad printing

One of the most widely used branding techniques due to its versatility and efficiency. The logo is transferred to the product by means of a silicone pad adaptable to all sorts of surfaces, obtaining a great definition of the logo even in very small printing areas.

Serigrafia

La più classica delle tecniche di stampa, che permette di rappresentare quasi tutti i disegni su un numero infinito di materiali piani, con un risultato ottimale e duraturo. Particolarmente adatta per stampe di grandi dimensioni, con la possibilità di utilizzare diversi colori di stampa per creare i disegni più creativi.

Silk-screen printing

The most classic of the printing techniques, allowing almost any design to be reproduced on an infinite number of flat materials, with an outstanding, long-lasting result. Particularly suitable for large formats, where several colours can be used to represent the most creative designs.

Serigrafia circolare

Serigrafia classica applicata ad articoli di forma cilindrica, conica o curva, con un risultato ottimale e duraturo. Permette di realizzare disegni a 360°, con una grande adesione all'articolo.

360° Silk-screen printing

Classic screen printing applied to products with cylindrical, conical or curved shapes, with optimal, long-lasting results. Enables 360° designs, with great adhesion to the article.

Transfer Serigrafico

Un'ulteriore evoluzione della serigrafia, che integra il logo nel prodotto. La stampa viene effettuata su una carta siliconata che viene poi trasferita con una piastra calda sull'articolo, ottenendo la massima integrazione del disegno sulla superficie del prodotto.

Screen printing transfer

A step beyond screen printing, which integrates the logo into the product. The printing is applied to a silicone paper which is transferred to the article using a hot plate, resulting in the maximum integration of the design on the surface of the product.

Transfer Digitale

Ideale per stampe full color di qualità fotografica. Il disegno viene stampato digitalmente su un supporto in vinile con un tipo di adesivo che si attiva con il calore e la pressione, con risultati eccezionali.

Digital transfer printing

Great for full-colour prints in photo quality. The design is digitally printed onto a vinyl surface applying a type of adhesive that is activated by heat and pressure, with exceptional results.

Sublimazione

Una delle opzioni più versatili per i disegni a colori. Il disegno viene prima trasferito su una carta speciale e poi sull'articolo (su poliestere o materiale trattato al 100% con poliestere) tramite calore, ottenendo un'eccellente finitura a colori.

Sublimation

One of the most versatile options for full colour designs. The design is first transferred onto a special paper and then to the item (either polyester or 100% polyester treated material) by heat, achieving an excellent full colour finish.

Stampa Digitale

Consente di stampare disegni full color, ottenendo una stampa a colori vivida e di qualità fotografica. La personalizzazione viene effettuata direttamente sull'articolo e richiede una stampante speciale. La superficie da stampare deve essere liscia e uniforme.

Digital printing

Enables printing of full-colour designs, achieving a quality logo with vivid, photographic colours. The customisation is applied directly on the product and a special printer is required. The surface to be printed must be smooth and regular.

Impression Stampa Digitale a 360°

È l'implementazione della stampa digitale tradizionale e può essere applicata efficacemente su superfici curve, coniche e cilindriche. I risultati sono particolarmente soddisfacenti per stampe full color.

360° Digital printing

Implements traditional digital printing, and can be effectively applied to curved, conical and cylindrical surfaces. The results are especially good on full colour designs.

Ricamo

Tecnica di personalizzazione che utilizza punti di ago e filo su articoli tessili, molto diffusa su capi di abbigliamento, berretti e borse. I risultati cromatici e la qualità della personalizzazione sono eccellenti.

Embroidery

Personalisation technique using needle and thread stitches on woven items, very popular on textile garments, caps and bags. The results in terms of colour and customisation quality are excellent.

Laser

Questa tecnica di stampa consiste nel rimuovere strati sottili di materiale fino a rendere visibile il disegno. Si distingue per la durata, la semplicità e i diversi tipi di finitura a seconda del prodotto, ottenendo un risultato elegante e permanente.

Laser printing

This branding technique removes thin layers of material until the design is visible. Distinguished by its durability, simplicity, and the variety of finishes depending on the type of product, obtaining at the same time an elegant and permanent result.

Laser a 360°

La soluzione per stampare oggetti cilindrici e conici... senza limitazioni dovute alla superficie curva del prodotto. Come il laser tradizionale, si distingue per la durata, l'eleganza e i diversi tipi di finitura a seconda del prodotto.

360°Laser printing

The solution for cylindrical and conical items, without being limited by the curved surface of the product. Like traditional laser, it stands out for its durability, elegance and the different types of finish depending on the product.

Termoincisione

Stampa a trasferimento termico in cui la personalizzazione si ottiene applicando all'articolo la temperatura e la pressione appropriate. È consigliata per materiali flessibili come la pelle o la similpelle, facilmente modellabili con il calore.

Hot stamping

A thermal transfer printing method in which the personalisation is obtained by applying the adequate temperature and pressure on the item. Recommended for flexible materials such as leather or synthetic leather, easily shaped by heat.

Doming / Goccia di resina

Questa tecnica consiste nello stampare il disegno su un'etichetta adesiva alla quale viene poi aggiunto uno strato di resina. Questo strato di resina conferisce alla stampa una straordinaria trasparenza e un effetto tridimensionale, aggiungendo lucentezza e proteggendo il logo. Consigliata per la stampa full color.

Doming / Epoxy

A technique that involves the printing of the design on an adhesive label, then adding a layer of resin. This layer creates an extraordinary transparency and a tridimensional effect, while adding gloss and protecting the logo. Recommended for full colour logos.
